Peter Szekély Primary Examiner Art Unit: 1714 Continuation Sheet (PTOL-303) 09/576,706

Application No.

Continuation of 5. does NOT place the application in condition for allowance because: the primary references show siding panels made from applicant's claimed ingredients, while the secondary and tertiary references prove that applicant's claimed composition can be fashioned into moldings using applicant's claimed method. Since siding panels are moldings, the use of the methods of the non-primary references, to manufacture the molded articles of the primary references would have been obvious to one having ordinary skill in the art, at the time the invention was made.
